

DRAFT 3

## GATEWAY GREEN OREGON SOLUTIONS PROJECT

### VISION STATEMENT

Transform the thirty-five acres of underutilized public land at the confluence of I-84, I-205, the I-205 multi-use path, and the Gateway MAX light rail station into a regional asset that provides open space and recreational opportunities while demonstrating Portland's and Oregon's commitment to sustainability. In addition, make environmentally sensitive connections to the more than ninety acres of publicly-owned property on the flanks of Rocky Butte that will enable residents and visitors to enjoy and help preserve the natural features of this unique property. Upon completion, this project will become a destination that provides an iconic and synergistic benefit to east Portland and the entire Gateway area.

More specifically, the vision for these properties embodies the following specific elements:

#### Recreation and Sustainability: Design, Programming and Cost-estimating

1. \*
2. \*
3. \*
4. \*

#### Collaborative Partnerships and Branding

1. \*
2. \*
3. \*
4. \*

#### Governance, Finance and Resource Identification
